Forecast for Monday 18 Apr 2022

Weather: Becoming dry through the early hours with clear spells but patchy low cloud forming around the summits later. Partly cloudy to begin with on Monday morning but brightening up with sunny spells. A scattering of showers developing during the morning, with a low chance of a briefly heavy shower during the afternoon. A few showers continuing into the evening, but most of the area becoming dry.

Chance of cloud-free hill tops above 600m: 40% becoming 80% by the end of the morning.

Low cloud and visibility: Periods of cloud above 600m during the early hours, gradually lifting through the early morning to patches above 850m by midday. Patches are possible around 700m in any heavier showers. Very poor visibility in the cloud early in the morning, but becoming generally very good with excellent air clarity at all levels by the afternoon. Sudden deteriorations to 2-4km are possible in the showers but visibilities shouldn't stay poor for long.

Meteorologist's View

Despite some hill fog at first, excellent visibility is expected on the whole by the afternoon. It will feel quite chilly on the highest summits but with strong periods of sunshine, some sheltered south facing slopes will actually feel pleasantly warm in the sunshine. UV levels will be moderate and possibly briefly high during the middle of the day, so it's worth taking a hat, sun protection and also waterproofs if you're planning on spending the day in the mountains.

Forecast for Tuesday 19 Apr 2022

Weather: Sunny spells to begin the day, but probably clouding over during the morning. Sunny intervals and cloudier periods are likely for the remainder of the day with an increasing chance of showers and these may be slow-moving where they occur. Feeling colder compared to recent days.

Maximum wind: Northerly 10-15 mph.

Chance of cloud-free hill tops above 600m: 40%, rising to 70%

Low cloud and visibility: Periods of cloud above 700m at first, lift to just above most summits by midday. Temporary patches around 750-850m during the showers, but many summits intermittently clearing of cloud at times. Very poor in cloud and moderate in showers but otherwise very good visibilities, particularly at lower levels.

Temperature: **Valleys:** Plus 3 Celsius rising to plus 14 Celsius.
At 600m: Plus 3 Celsius, rising to plus 6 Celsius.
Freezing level: Above the summits.
